

Autologous Tissue Repair

Products, Players and Prospects

Autologous Tissue Repair: Products, Players and Prospects

Greystone Associates is pleased to announce the publication of a new market study. **Autologous Tissue Repair: Products, Players and Prospects** is a comprehensive evaluation and analysis of the technology, products and participants providing the driving force behind this evolving segment of the healthcare sector.

The study is designed to provide healthcare company decision makers, technology developers, product designers, healthcare marketers, and supply chain participants with a detailed understanding of the economics, technologies, treatment segments, and commercial opportunities for tissue repair and replenishment using cells derived from the patient. Provider organization business managers, healthcare administrators and investors will also benefit from this study.

The Potential of Patient Derived Tissue Repair

The ability to isolate, purify and re-inject patient-derived cells with regenerative properties has led to a number of therapeutic products for the treatment of refractory injuries and wounds. Autologous therapies are having an impact on a number of areas, including cardiovascular medicine, refractory wound care, orthopedics, and surgical medicine. The potential economic benefits of autologous treatments are significant, as an aging population struggles with intractable ailments that historically have required numerous follow-up provider visits. While the majority of approved autologous products require remote processing, the number of autologous therapeutics that can be processed at the point-of-care is increasing.

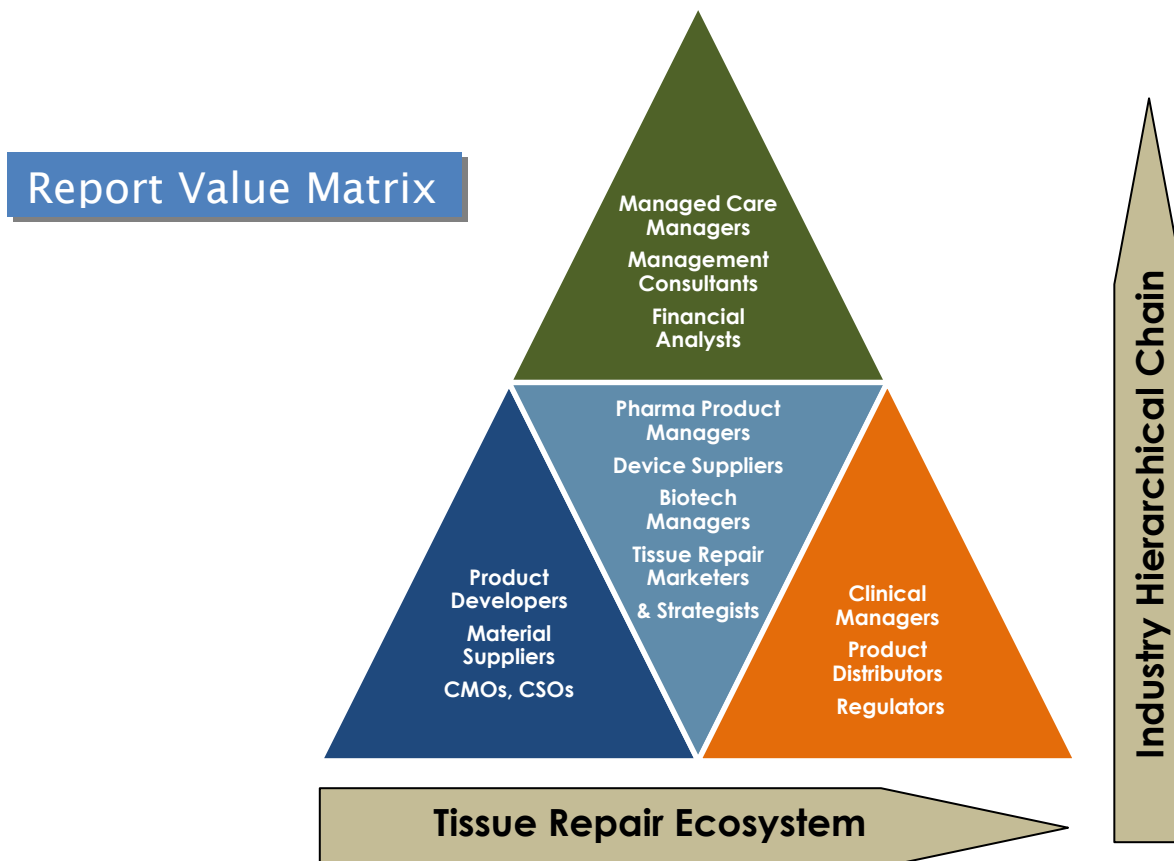

Table of Contents

Executive Summary

Autologous Tissue Repair – Market Structure

- Tissue Repair Market Segments
- Demographics and Growth
- Competitive Landscape
- Demand Drivers
- Risk Factors

Therapeutic Application Segment Analysis

- CNS
- Orthopedic
 - Bone Graft Fixation
 - Cartilage Repair
 - Ligament Repair
- Surgical
 - Cardiovascular Procedures
 - Neurosurgical Procedures
 - Plastic/Cosmetic Surgery
- Wound Care
 - Acute Trauma
 - Burns
 - Diabetic Ulcers
 - Pressure Ulcers
 - Venous Ulcers

Autologous Therapeutics - Product Analysis, Outlook and Forecasts

- Chondrocyte Harvesting
- Cardiovascular Grafts
- Epidermal Grafts
- Macrophage Activation
- Skin Cell Suspension
- Thrombin/Platelet Gels
- Stem Cell Isolation

Market Factors

- Clinical Trial Enrollment
- FDA Guidelines
- Reimbursement
- Evolving Patient Demographics
- Point-of-Care Processing
- Protocols and End-Points

Autologous Tissue Repair Company Profile

Feature Summary

- Analyzes and evaluates autologous tissue repair products and product candidates and assesses the market potential for existing and probable future products
- Examines tissue repair demand drivers and evolving market factors
- Provides detailed status of autologous therapies currently in development
- Forecasts the impact of tissue regeneration technology and therapeutics on application segments and projects probable future developments
- Profiles autologous tissue repair market participants, their technology, product development activity, and business strategies
- Provides forecasts and market data to 2012
- Evaluates the impact of economic, technology, and regulatory factors on tissue regeneration products, companies, and therapies

Report Format and Availability

This report is available electronic format. A site license for a single physical location and an Enterprise license are also available.

Methodology

Research methodology is based on primary research in the form of in-depth interviews with key market participants, technology developers, distributors, industry experts, and market influencers, a list that includes regulatory officials, industry trade groups, and materials standards organizations.

Primary data is evaluated and normalized against secondary sources including trade journal articles, technical literature, industry publications, company data sheets and published information, and statistical data from government agencies and trade associations.

Forecasts and projections of market demand and future market activity are derived using standard modeling and statistical techniques.

About Greystone Associates

Greystone Associates is a medical technology consulting firm focused on the areas of medical market strategy, product commercialization, venture development, and market research. We assist medical and healthcare market participants in achieving their business objectives through the creation of detailed development strategies, product commercialization programs, and comprehensive market and technology research and analysis.

Our market research publications are designed, researched and written to provide timely and insightful information and data on focused market segments, with the aim of providing market participants with the essential knowledge to refine and execute their marketing plans and financial targets.

Ordering Information

Orders may be placed via postal mail, e-mail or fax. Orders not accompanied by a purchase order must contain a telephone number for verification, and clearly indicate the physical shipping address.
