

Medical Device Sourcing

Japan

Brochure

Greystone
Research Associates

Locating medical device suppliers and understanding their business activities and capabilities can be a time-consuming endeavor. The rise of rapidly growing economies, particularly in Asia and South America are changing the landscape of the medical device industry. Devices receiving marketing authorization from the U.S. FDA are increasingly being manufactured outside of North America. Understanding the global medical device supply chain and the supplier relationships that drive this industry segment is an important success factor in the new product development decision process.

There are 514 medical device companies located in Japan and listed in the US FDA Establishment Registration and Device Listing for 2020. This publication categorizes them based upon their industry activities, device applications and service offerings. This publication includes 245 pages of information on this important market segment.

Executive Summary
Medical Devices in Japan

I. Medical Devices – MEDICAL APPLICATION

SEGMENTS

Anesthesiology
Cardiovascular
Clinical Chemistry
Dental
Ear, Nose & Throat (ENT)
Gastroenterology/Urology
General Hospital
Hematology
Immunology
Microbiology
Neurology
Ophthalmology
Orthopedic
Pathology
Physical Medicine
Radiology
Surgery
Toxicology

II. Medical Device Sourcing – SUPPLIERS BY PROVINCE

Aichi
Akita
Chiba
Fukui
Fukuoka
Fukushima
Gifu
Gunma

Hiroshima
Hyogo
Ibaraki
Kyoto
Nagano
Niigata
Osaka
Saitama
Shiga
Shizuoka
Tochigi
Tokyo
Yamagata

III. Device Suppliers & Products, All Provinces

Anesthesiology Devices
Cardiovascular Devices
Clinical Chemistry Devices
Dental Devices
ENT Devices
Gastroenterology/Urology Devices
General Hospital Devices
Hematology Devices
Immunology Devices
Microbiology Devices
Neurology Devices
Ophthalmology Devices
Orthopedic Devices
Pathology Devices
Physical Medicine Devices
Radiology Devices
Surgery Devices
Toxicology Devices

IV. Device, Service Type, Supplier and Product Code

Supplier and Product Class for Service Type – Complaint File Establishment

Supplier and Product Class for Service Type – Contract Manufacturer

Supplier & Product Class for Service Type - Foreign Exporter

Supplier & Product Class for Service Type - Manufacturer

Supplier & Product Class for Service Type – Repackager/Relabeler

Supplier & Product Class for Service Type – Specification Developer

V. Index of Medical Device Companies in Japan Listed in the FDA Establishment Registration and Device Listing Database

Companies, from 3-D Matrix, Ltd. To Asahi Kasei Medical MT Corp., Okatomi Plant

Companies, from Asahi Kasei Pharma Corp to Cyberdyne Inc.

Companies, from Daio Paper Corp to Fuji Medical Instruments Mfg. Co, Ltd.

Market Factors

Regulatory Issues

What You Will Learn

- Who are the key suppliers/CMOs of medical devices that are located in Japan?
- What medical device sourcing services are offered by Japan companies? Where are they located?
- Who are the foreign private-label distributors in Japan?
- What is the distribution of contract medical device suppliers by device class in Japan? By location/province? By service offerings?
- Which province dominates the medical device sourcing landscape in Japan? For cardiovascular devices? For orthopedic devices? For general hospital devices? For Radiology devices?
- How do I find a list of Japanese companies that can perform the tasks that I seek for the devices I require?

Report Format and Availability

This report is available electronic format. A site license for a single physical location and a corporate license are also available. Custom licensing options to address specific company user requirements are available by calling client services at 603-440-5710, or by emailing clientservices@greystoneassociates.org.

Methodology

Research methodology is based on primary research in the form of in-depth interviews with key market participants, technology developers, distributors, industry experts, and market influencers, a list that includes regulatory officials, industry trade groups, and materials standards organizations.

Primary data is evaluated and normalized against secondary sources including trade journal articles, technical literature, industry publications, company data sheets and published information, and statistical data from government agencies and trade associations.

Forecasts and projections of market demand and future market activity are derived using standard modeling and statistical techniques.

About Greystone Research Associates

Greystone Research Associates is a medical technology consulting firm focused on the areas of medical market strategy, product commercialization, venture development, and market research. We assist medical and healthcare market participants in achieving their business objectives through the creation of detailed development strategies, product commercialization programs, and comprehensive market and technology research and analysis.

Our market research publications are designed, researched and written to provide timely and insightful information and data on focused market segments, with the aim of providing market participants with the essential knowledge to refine and execute their marketing plans and financial targets.
