

Inhaled CNS Therapeutics

APIs, Indications, Markets &
Forecasts

Report Brochure

Greystone
Research Associates

Greystone Research Associates is pleased to announce the publication of a new market study. **Inhaled CNS Therapeutics: APIs, Indications, Markets and Forecasts** is a comprehensive evaluation and analysis of the technology, products and participants providing the driving force behind this growing segment of the drug delivery sector. The report has been designed and developed to provide pharmaceutical company decision makers, drug developers and formulators, drug device designers, and industry strategists with a detailed understanding of the expanding impact of inhaled CNS therapies on pharmaceutical strategies and healthcare treatment protocols. Provider organization business managers, healthcare administrators and investors will also benefit from this publication.

Quick Onset and Ease of Use Driving Inhaled CNS Therapeutics

Delivering drugs to the central nervous system presents unique challenges. But drug developers and researchers have discovered that delivering CNS therapeutic drugs via inhalation mitigates several of these issues. The accessibility and vascular structure of the nose make it an attractive route for delivering both small molecule drugs and biologics across the blood-brain barrier to the CNS. Pulmonary delivery to the deep lung can have favorable pharmacokinetics. And inhaled delivery offers the potential for faster onset of action and less frequent dosing relative to oral drugs. These potential advantages have spurred activity in inhaled CNS therapeutics for a range of disorders. As aging population demographics and managed care initiatives drive growth in home health care and self-administration of drug therapies, inhaled medicine is increasingly being viewed as patient-friendly and cost-effective. Our analysis indicated that inhaled CNS administration is well positioned to take advantage of these trends and evolve into a significant factor in the future of pharmaceutical development and commercialization of CNS therapeutic drugs.

Executive Summary

Drug Delivery Market Dynamics
The Trend toward Self-Administration
CNS Therapeutic Market Dynamics
Growth in Home Healthcare
Market Drivers
Inhaled Drug Development Factors
Absorption
Bioavailability
Device Design Parameters
Nasal Delivery Pharmacokinetics
Nasal Device Characteristics
Pulmonary Delivery Pharmacokinetics
Pulmonary Device Characteristics
Inhaled CNS Drugs: FDA-Approved Products
Inhaled Drugs for Depression
Inhaled Drugs for Pituitary Hormones
Inhaled Drugs for Migraine
Inhaled Drugs for Pain Management
Inhaled Drugs for Parkinson's Disease
Inhaled Drugs for Schizophrenia
Inhaled Drugs for Seizures
Development-Stage Drugs
Inhaled Drugs in Development for Depression
Inhaled Drugs in Development for Epileptic Seizures
Inhaled Drugs in Development for Migraine
Inhaled Drugs in Development for Stroke
Inhaled CNS Market Segment Analysis
Alzheimer's and Dementia
Depression
Insomnia
Migraine
Pain Management
Parkinson's Disease
Schizophrenia
Seizures
Market Factors
FDA Regulations
Clinical Trials
Drug-Device Collaborations
Rx-to-OTC Switching
Impact of Generics

Company Profiles

What You Will Learn

- Analyzes and evaluates systemic inhaled drug therapeutics for CNS disorders and diseases and assesses the market potential for existing and probable future products
- Evaluates drug technologies and market development issues
- Provides detailed assessments of CNS therapeutic market segments, market demographics, and business strategies
- Charts product sales data, market share, and forecasts to 2012
- Profiles sector companies, their product development activities, business strategies, and corporate alliances and affiliations
- Assesses the importance of alliances and partnerships on future CNS therapeutic products
- Evaluates the impact of economic, technology, and regulatory factors on Inhaled CNS Therapeutics

Report Format and Availability

This report is available electronic format. A site license for a single physical location and a corporate license are also available. Custom licensing options to address specific company user requirements are available by calling client services at 603-440-5710, or by emailing clientservices@greystoneassociates.org.

Methodology

Research methodology is based on primary research in the form of in-depth interviews with key market participants, technology developers, distributors, industry experts, and market influencers, a list that includes regulatory officials, industry trade groups, and materials standards organizations.

Primary data is evaluated and normalized against secondary sources including trade journal articles, technical literature, industry publications, company data sheets and published information, and statistical data from government agencies and trade associations.

Forecasts and projections of market demand and future market activity are derived using standard modeling and statistical techniques.

About Greystone Associates

Greystone Associates is a medical technology consulting firm focused on the areas of medical market strategy, product commercialization, venture development, and market research. We assist medical and healthcare market participants in achieving their business objectives through the creation of detailed development strategies, product commercialization programs, and comprehensive market and technology research and analysis.

Our market research publications are designed, researched and written to provide timely and insightful information and data on focused market segments, with the aim of providing market participants with the essential knowledge to refine and execute their marketing plans and financial targets.

Ordering Information

Orders may be placed via postal mail, e-mail or fax. Orders not accompanied by a purchase order must contain a telephone number for verification, and clearly indicate the physical shipping address and billing address.

Payment

We accept the following forms of payment:

Company Check: Please make checks payable to 'Greystone Associates'

Credit Cards: We accept MasterCard, Visa and American Express

Wire Transfers: See 'Wire Transfers' below for more information

Orders Outside the U.S.

Orders must be prepaid via credit card, company check in US funds and drawn on a US bank, or wire transfer.
